Just so we are all on the same page
the boats currently sinking at the dock

I have a buddy coming to help. If we
can't solve im calling the tow boat to
pump all the water out

Leeeeeeee

What

L

What u mean

Welcome to my life

Leeeeeeee

L

I'm confused

The boats sinking

Leeeeeeee

L

Where is the water coming from

Lee

Leave me alone til I solve this problem

Didn't want the boat to sink and u not
know wtf is going on

Now u know. Now let me work

L

Lol

Alex showed up to clean the interior
and found the boat sinking.

Thus what started this whole fore drill

Fire

B

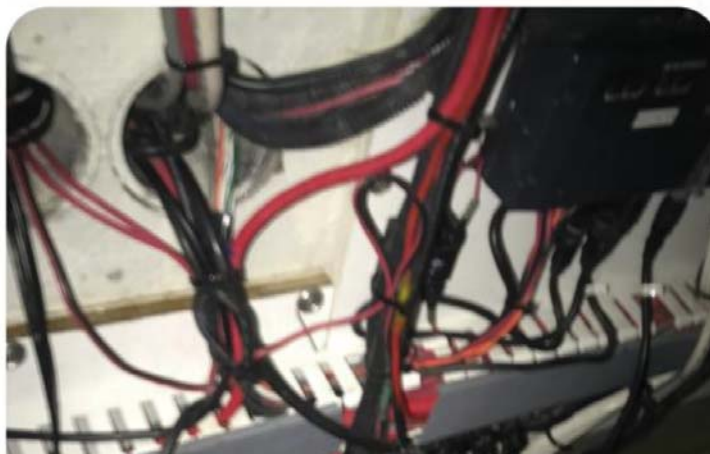

Jeeez

Tow boats here

In process

If I can't figure out the power situation
after it's pumped out

We are going to need an emergency
haul out

Leeeeeeee

L

Did u find the leak

Brent L.

B

Unreal

We cannot locate the leak. It's under the surface. No bubbles. No nothing. I've looked every fkn where

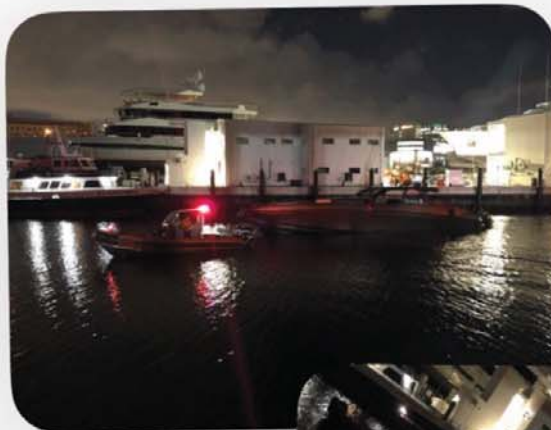

And tried everything

Brent L.

B

Unbelievable

We put the boat back into the water
and we don't see any significant leaks.

Ran thru the entire boat.

We do see some sort of backfired from
the bilge pumps which Eric saw and he
is going to look into

Back feed. Not backfired*

Brent L.

B

Weird

Leeeeeeee

L

Ok

We have no power and things are
malfunctioning due to the water
ingestion.

PLT-SUPPL-0044

We have no power and things are malfunctioning due to the water ingestion.

Brent L.

That could create that much water

B

That's not good

It seems we lost power on the boat. Because there is no power from the power cord.

So we had to hard wire it to gain power

Leeeeeeee

L

Let fix the wires lol need boat lol

So seems we lost power and with help of the rain the boat filled up some. And the waves and wind and the water caused further sinking

Leeeeeeee

L

O got it

Generator doesn't have spark

Drained the water and added oil

To lube cylinders
